THE VILLAGE OF SUGAR MOUNTAIN
251 Dick Trundy Lane
Sugar Mountain, NC 28604

March 13, 2026

We have begun our transition to spring cleaning with the nice weather that has been occurring. Over the next several weeks, we will begin to remove the accumulated gravel and screenings from the winter along our roadways. There will be traffic delays as this is accomplished as one lane will need to be closed at a time in most areas. It appears that true March weather will interfere with this task as usual and we are prepared for that. We now only lack a couple more areas of damage from Helene to be repaired. The slide area on Rough Ridge has been completed, along with the repaving of the slide area in the 2000 block of Grouse Moor Drive. Timber Ridge Road major repairs have been completed, and now we only await some warmer weather toward the end of next week for the paving to be finalized and that area marked off the list. Next up is the replacement of a culvert and stabilizing the road slope between the tennis courts and Glenwood Road. This is going to require the complete closure of one lane of traffic during this process, so please be aware.

Work on the golf course has progressed to the point where we have been able to mow all the fairways for the first time. Hopefully we receive the 100% plans for the stream restoration portion of the recovery next week and the bids can go out to begin that work. We will be able to open the course with all 18 holes but depending on the scope of the stream work, periodic hole closures will be necessary for the safety of the workers during the golf season. We have set April 17 as the opening day for our 2026 season. If anyone has any questions or comments about ongoing work, do not hesitate to contact me.

Respectfully submitted,
Bill Daniels,
Village Maintenance Director
