

April 17, 2026

We are managing to stay plenty busy with the beautiful warm spring weather. The men are busy cleaning up the remnants of the winter season. Shoveling up screenings, picking up limbs and brush, and continuing to clean ditches. This is all in preparation for beginning the road striping which I hope to start in the next couple of weeks. The snow plows and spreaders have been greased, serviced and put to bed for the summer. We have also been very diligent in making sure the shoulders of the roadways have an adequate gravel layer alongside the asphalt. This is not as easy a project as one might think, managing traffic and placing the material properly as to not damage the edge of the pavement. Sugar Mtn has the most talented crew in the area, and are able and willing to complete any task placed before them.

Today is opening day for the 2026 golf season. Many hours of hard work have been applied to getting all 18 holes ready for play this year. While the scars of Helene still remain in the streams and adjacent areas, the turf on the course has never been better. I know many of you have been on the finer golf courses in the area, but I can guarantee that you have not played golf on any finer conditioned grass in the High Country. I will put my crew up against any in the area in the form of knowledge, work ethic and genuine care and love of this golf course. I am looking forward to a fantastic golf season this year, and we will do everything we can to accomplish this. If anyone has any questions or concerns, do not hesitate to contact us.

Respectfully submitted,

Bill Daniels,

Village Maintenance Dir.
